Portable Speed Bump

Anti-slip Mat in the back

The highly visible system is designed for temporary speed control applications, where it is desired to slow down the traffic speed to 40 km/h. The secret behind the success of the system is its unique waffle-style rubber underlay, which enable adhesion to the road surface as vehicles traverse. It has been designed for use for the entrance of the highway work zones to assist to reducing speed and therefore creating a safer work environment for road workers.
